SM500F
Field mountable paperless recorder

Innovative, simple, reliable recording
Measurement made easy

Unique universal mounting capability
— wall-, pipe- or panel-mount
— ultra-slim design, ≤90 mm (3.5 in.) deep

Secure data recording
— 64 MB internal Flash memory
— archiving to SD memory card

21 CFR Part 11 compliant data security
— extensive physical and electronic security features

12 software recording channels for recording of:
— up to 7 analog/digital inputs
— math function results
— Modbus signals

GAMP validation package
— 21 CFR part 11 compliant

Remote access and data retrieval
— Ethernet connectivity
— MODBUS RS485 connectivity

Install into the harshest of process environments
— protection to NEMA4X and IP66 standards

Choice of displays
— color TFT or monochrome options

Quick and easy setup
— on-line help and Windows™-style menus

Batch recording
— easy tracking of batch processes

Power and productivity for a better world™
SM500F

The SM500F is a field-mountable paperless recorder. Its unique enclosure design enables wall-, pipe- or panel-mounting of the unit. Process data is displayed clearly to the local operator through a variety of display formats, including chart, bargraph and digital indicator displays. Additionally, process data is logged securely to the removable memory card. Ethernet communications provide convenient remote monitoring of the process and access to logged data.

KEY

- **Standard**
- **Option**
Unique Enclosure

The SM500F is housed in a unique enclosure for a paperless recorder. "Out of the box" it is possible to either wall- or panel-mount the device. The SM500F can also be pipe-mounted using the optional kit.

In any type of installation the SM500F's enclosure meets both IP66 and NEMA 4X hose-down standards. This means that the unit requires no costly additional enclosures or protection when mounted in applications that require frequent hose-down.

When panel-mounted the SM500F's ultra slim profile requires a panel depth of only 67 mm (2.7 in.). This ensures that there are no problems when replacing existing recording devices and enables the SM500F to be installed into existing panels where required.
Save Time and Money

The unique enclosure design of the SM500F enables it to be wall-mounted without the need for additional costly enclosures. To wall-mount a traditional paperless recorder, an additional enclosure must be sourced and a cut-out made to suit the recorder, glanded cable entries made and any internal wiring required for safety regulations installed and tested. The work involved in producing such an enclosure increases costs and installation times significantly.

Flexible Recording

12 software recording channels are featured in the SM500F as standard. Up to 7 physical analog/digital inputs can be fitted to the SM500F and assigned to a software recording channel. The remaining software recording channels can be used to record math block results, alarm status, signals communicated via Modbus or any other analog or digital signal available within the recorder. Each software recording channel features 4 process alarms and 2 optional totalizers.

High Specification I/O

The SM500F features up to 4 fully universal inputs. Each input can be configured to accept a variety of process signals directly – including mA, mV, RTD (3- or 4-wire), thermocouple, voltage, resistance or digital signal. Process data can be logged at the high speed of 100 ms. All universal inputs have 500V channel-to-channel isolation.

Alternatively, the SM500F can be specified with 1 universal and 6 process inputs. Process inputs can accept mV, mA, thermocouple, voltage and digital inputs. Each process input pair is isolated by 500V.

Included as standard is a relay output that can be driven from process alarms, memory card capacity warning or many other events. Two additional relays can be added if required.

The SM500F can be upgraded easily with additional I/O due to its modular design. When inserted, additional inputs or relay modules are recognized by the recorder and can then be configured ready for use.

Ease of Use

Operation of the SM500F is performed via dedicated operator keys on the front panel. All operation and configuration is performed via intuitive Windows-style menus.

The SM500F includes context-sensitive online help that quickly assists the operator when required. This enables the SM500F to be installed quickly and configured without the use of the instruction manual.

Comprehensive and intuitive on-line help system
Display Options
The SM500F is available with a choice of displays. Depending on the application requirements, either a 144 mm (5.7 in.) color TFT or 120 mm (4.7 in.) monochrome FSTN display can be specified.

21 CFR part 11 Compliance and GAMP Validation Package
With its comprehensive audit trail, secure archiving format and extensive physical and configuration security features, the SM500F is ideally suited to applications where compliance to 21CFR part 11 (the FDA’s regulations regarding electronic record keeping) is required (for further information refer to INFO06/119).

In keeping with this, a template for validating the SM500F paperless recorder is available. Following GAMP 5 (a risk-based approach to compliant GxP computerized systems), the template is designed to make the validation process as simple as possible and provides an IQ and OQ that is completed at the customer site, before and after installation. Once completed, the template is then packaged together with other documentation relating to the system as a whole, ready to be presented to the governing regulatory body for inspection.
Extensive Security Features

The SM500F has extensive physical and electronic security features which ensure the integrity of the recorder’s configuration and archived data. These features ensure the SM500F meets the requirements of 21 CFR Part 11.

- An optional door lock can be specified. When locked the recorder’s SD card is protected from unauthorized access.
- The recorder’s configuration can be password protected. Up to 12 users with individual passwords and access levels can be configured.
- To meet the requirements of regulatory bodies the configuration mode of the recorder can be locked by an internal security switch. This switch can then be protected by a tamper-evident seal providing physical evidence of the integrity of the recorder’s configuration.
- Security of all process data archived to the SD card is always assured. Files stored in comma-separated variable format are attributed with an Encrypted Digital Signature and files stored in binary format are encoded securely with inbuilt integrity checks. Both data storage formats are compliant with FDA standard 21 CFR Part 11.

RS485 Communications

Optional RS485 communications enable real-time data to be transferred to and from the SM500F using Modbus protocol. Ideal for receiving instantaneous data values from a master controller, data communicated via Modbus can be trended on-screen and securely archived to the SM500F’s media card. The recorder’s batch recording capability can also be controlled via Modbus providing a seamless link between the SM500F and the batch/process controller.

Ethernet Communications

The SM500F can provide 10BaseT Ethernet communications via a standard RJ45 connector and uses industry-standard protocols TCP/IP, FTP and HTTP. The use of standard protocols enables easy connection into existing PC networks.

Data File Access via FTP (File Transfer Protocol)

The SM500F features FTP server functionality. The FTP server in the recorder is used to access its file system from a remote station on a network. This requires an FTP client on the host PC. Both MS-DOS® and Microsoft® Internet Explorer version 5.5 or later can be used as an FTP client.

- Using a standard web-browser or other FTP client, data files contained within the SM500F’s memory card can be accessed remotely and transferred to a PC or network drive.
- Four individual FTP users can be programmed into the SM500F. An access level can be configured for each user.
- All FTP log-on activity is recorded in the audit log of the SM500F.
- Using ABB’s DataManager Pro software, data files from multiple recorders can be backed-up automatically to a PC or network drive for long-term storage, ensuring the security of valuable process data and minimizing the operator intervention required.
Embedded Web Server

Contained within the SM500F is an embedded web-server that provides access to web pages created within the recorder. The use of HTTP (Hyper Text Transfer Protocol) enables standard web browsers to view these pages.

- Presented within the web pages is the current display of the recorder, detailed information on process signals, alarm conditions, totalizer values and other key process information.
- The historical logs stored in the SM500F’s internal buffer memory can be displayed in full form within the web pages.
- Operator messages can be entered via the web server enabling comments to be logged to the recorder.
- All of the information displayed on the web pages is refreshed regularly enabling them to be used as a process supervision tool.
- The recorder’s configuration can be switched to a different configuration. This can be an existing configuration in the internal memory or a new configuration file transferred to the recorder via FTP.
- The recorder’s real-time clock can be set via the web server. Alternatively, the clocks of multiple recorders can be synchronized using FTS (File Transfer Scheduler).

On-line Demonstration

A demonstration of these features is available from an on-line recorder accessible via the internet. In the address bar of your web browser enter 'http://217.46.239.73'.

Email Notification

Via the SM500F’s inbuilt SMTP client the recorder is able to email notification of important events. Emails triggered from process alarms or other critical process events can be sent to multiple recipients. The recorder can also be programmed to email reports of the current process status at specific times during the day, the content of which can be tailored to suit your specific process needs.

Remote Access and Monitoring

Ethernet communications can provide a link to recorders installed in remote locations. Via the use of a dial-up router an SM500F can be installed in a remote location and accessed via a public telephone network when required.
**Powerful Operator Displays**

**Horizontal Chart Display**

**Vertical Chart Display**

**Digital Display**
**DataManager Pro Off-Line Review and Analysis**

Using ABB’s DataManager Pro software, archived process data and historical logs recorded to a removable media card can be reviewed easily.

- Database management of data files provided by DataManager Pro ensures simple, secure, long-term storage and retrieval of historical data.
- The graphing capabilities provided by DataManager Pro ensure easy interrogation of process data.
- The validity of all data files is always checked by DataManager Pro during the storage and retrieval process, ensuring maximum data integrity.

For further information on the capabilities of DataManager Pro, refer to data sheet DS/RDM500–EN.

---

**Software Options**

**Totalizers**

Multi-function totalizers are available as an option. Each software recording channel has 2 totalizers that enable resettable and cumulative totals to be displayed simultaneously.

Totalizers can be configured to:

- calculate flow inputs from analog inputs
- count low frequency digital pulses
- calculate F0 sterilization values

**Math & Logic**

Advanced math and logic capabilities are available as an option. 8 multi-element math and 8 multi-element logic equations can be configured. Equations can be nested into each other to provide extensive capabilities.

- Mean, standard deviation and rolling averaging functions are provided.
- Standard addition, subtraction, multiplication and division are complemented with Log, Ln, Square root, power, Sin, Cos, Tan and absolute functions.
- Switching of process signals can be achieved via the high/low/middle signal selection and multiplexing functions.
- Predefined equations are provided for relative humidity and F0 measurements.
- AND, NAND, OR, NOR, XOR and NOT operators are available within the logic equations.

All math and logic equation results can be shown on the display of the SM500F and archived to the removable media. Detailed diagnostic functions are provided for both the math and logic equations.

**Batch Recording**

A batch recording option enables simple recording and reviewing of batch processes. When a batch is started it is tagged with a unique batch number, operator identification and three user-definable description fields. All information is entered on-screen with a history function allowing quick entry of commonly repeated descriptions.

Using DataManager Pro, batches can be simply and quickly traced for review using the unique batch number and description information entered at the time of recording. Additional functionality provides the ability to search and sort batch records for an entire production facility in many ways, including by product type, operator and time and date of processing.
Specification

Operation and Configuration

Configuration
Via tactile membrane keys on front panel or PC Configuration
Multiple configuration files can be stored in internal (up to 16 files) or external memory (with removable media option fitted)

Security

Physical
Optional lock on door

Configuration security

Password protection
Access to configuration is allowed only after the user has entered a password

Internal switch protection
Access to configuration is allowed only after a hardware switch has been set. This switch is situated behind a tamper-evident seal

Logging security

Configuration
Can be configured for password protection or free access to logging levels

Basic type security

4 individual users with unique usernames and passwords

Advanced type security

Number of users
Up to 12

Usernames
Up to 20 characters. Usernames are unique (names cannot be repeated)

Access privileges
Logging access – Yes/No
Configuration access
None/Load file only/Limited/Full

Passwords
Up to 20 characters
A minimum required password length of 4 to 20 characters can be configured and a password expiry time can be applied to eliminate password age

Password failure limit
Configurable for 1 to 10 consecutive occasions or ‘infinite’
A user is deactivated if a wrong password is entered repeatedly

Deactivation of inactive users
Can be disabled or configured for 7, 14, 30, 60, 90, 180 or 360 days of inactivity
Users are deactivated (by removal of access privileges) after a period of inactivity

Custom Linearization

Number
2

Number of breakpoints
20 per linearizer

Operator Messages

Number
24

Trigger
Via front panel or digital signals

Recording in alarm/event log
Can be enabled or disabled on configuration

Display

Monochrome FSTN or Color TFT, liquid crystal display (LCD) with built-in backlight and contrast adjustment

Diagonal display area
Color 144 mm (5.7 in.)
Monochrome 120 mm (4.7 in.)

76800 pixel display*
*A small percentage of the display pixels may be either constantly active or inactive. Max. percentage of inoperative pixels <0.01%.

Language

English, German, French, Italian, Spanish, Portuguese, Chinese and Dutch

Dedicated operator keys

- Group select/Left cursor
- View select/Right cursor
- Menu key
- Up/Increment key
- Down/Decrement key
- Enter key

Chart screen intervals
Selectable from 18 s to 7 days

Chart divisions
Programmable for up to 10 major and 10 minor divisions

Chart annotation
Alarm and operator messages may be annotated on the chart
Icons to identify the type of event, time of occurrence and tag are displayed

Process Alarms

Number
48 (4 per recording channel)

Types
High/Low process, latch & annunciator
Rate fast/slow

Tag
20-character tag for each alarm

Hysteresis
Programmable value and time hysteresis (1 to 9999 s)

Alarm enable
Allows alarm to be enabled/disabled via a digital input

Alarm log enable
Recording of alarm state changes in the alarm/event log can be enabled/disabled for each alarm

Acknowledgement
Via front panel keys or digital signals
Real-time Alarms

Number
4
Programmable
Day of the week, 1st of month, start and duration times

Recording to Internal Memory

Data Channels

Internal buffer memory
64 MB Flash memory provides storage for 16 million samples
Oldest data is overwritten automatically by new data when memory is full

Data integrity checks
Checksum for each block of data samples

Independent process groups
2

No. of recording channels
6 per group

Sources
Analog inputs, MODBUS™ inputs, any digital signal, math block

Filters
Programmable for each channel to allow recording of: instantaneous values, average, max., min. and max. & min. value over sample time

Primary/Secondary sample rates
Programmable from 0.1 s to 12 hours for each process group

Primary/Secondary sample rate selection
Via any digital signal or from password protected menu

Recording start/stop control
Via any digital signal or from password-protected menu

Recording Duration
Approximate duration calculated for continuous recording of 4 channels of analog data (for 8 channels divide by 2, for 2 channels multiply by 2 etc.)

<table>
<thead>
<tr>
<th>Sample Rate</th>

</tbody>
</table>

Archiving to Removable Media

Removable storage media options

- SD Card

Data that can be saved to removable media

- Recorded data for group 1 & 2 channels
- Alarm event log data
- Totalizer log data
- Audit log data
- Configuration
- Screen capture images

File structure
Configurable as either binary-encoded or comma-separated

Filename
20-character tag, prefixed with date/time

Data verification
Carried out automatically on all writes to removable-media files

Card Compatibility
ABB recorders comply with approved industry standards for memory cards and ABB fully tests any memory card they supply for compatibility with this device. Other cards not supplied by ABB may not be fully compatible with this device and therefore may not function correctly.

Card Size
Cards up to 2 GB capacity may be used

Recording Duration
Approximate duration calculated for continuous recording of 4 channels of analog data

(for 8 channels divide by 2, for 2 channels multiply by 2 etc.)

Analog/Digital Inputs

General
Number of inputs
7 (1 as standard, up to 6 optional)
Input types
- mA, mV, voltage, resistance, THC, 3-wire RTD, 4-wire RTD, volt-free digital, 24 V DC digital*

Thermocouple types
- B, E, J, K, L, N, R, S, T

Resistance thermometer
- PT100
Other linearizations
- \sqrt{x}, x^{2/3}, x^{5/2}, custom linearization

Digital filter
- Programmable 0 to 60s

Display range
- 99999 to +999999

Common mode noise rejection
- >120 dB at 50/60 Hz with 300 Ω imbalance resistance

Normal (series) mode noise rejection
- >60 dB at 50/60 Hz

CJC rejection ratio
- 0.05 °C/°C

Sensor break protection
- Programmable as upscale or downscale

Temperature stability
- 0.02 %/°C or 2 μV/°C

Long term drift
- <0.2 % of reading or 20 μV annually

Input impedance
- >10 MΩ (millivolts inputs)
- >10 MΩ (voltage inputs)
- 44 Ω (mA inputs)

Analog to digital converter resolution
- 16 bit

- Physical medium: 2-wire RS485
- Protocol: RTU

**Baud rates**
- 1200, 2400, 4800, 9600, 88400, 115200

**Parity**
- None, odd, even

**Digital input**

<table>
<thead>
<tr>
<th>Number</th>
<th>2</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Digital input types</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volt-free/24 V (automatic)</td>
</tr>
</tbody>
</table>

**Polarity**
- User-configurable

### Totalizer (optional)

<table>
<thead>
<tr>
<th>Number</th>
<th>2 per recording channel, 10-digit totals</th>
</tr>
</thead>
</table>

**Type**
- Analog, digital, F0

**Statistical calculations**
- Average, maximum, minimum (for analog signals)

### Advanced Math (optional)

**Type**
- 8 equations provide ability to perform general arithmetic calculations including F0, mass flow (of ideal gases), relative humidity and emissions calculations

**Size**
- 40-character equation

**Functions**
- +, −, /, log, Ln., Exp, X^n, √, Sin, Cos, Tan, mean, rolling average, standard deviation, high/median/low select, multiplexer, absolute, relative humidity

**Tags**
- 8- and 20-character tags for each block

**Update rate**
- 1 enabled Math block is updated every 100 ms

### 2-Wire Transmitter Power Supply (optional)

<table>
<thead>
<tr>
<th>Number</th>
<th>2 isolated supplies</th>
</tr>
</thead>
</table>

**Voltage**
- 24 V DC nominal

**Drive**
- 22 mA (each supply)

### Ethernet Module (optional)

**Physical medium**
- 10BaseT

**Protocols**
- TCP/IP, FTP (server), HTTP, SMTP, Modbus TCP (Client + Server)

**FTP server functions**
- Directory selection & listing
- File upload/download
- 4 independently configurable users with full or read-only access

**Web server functions**

**SMTP client compatibility**
- Compatible with MS Exchange versions up to and including MS Exchange 2003
Logic Equations (optional)
Number
8
Size
11 elements each
Functions
AND, OR, NAND, NOR, XOR, NOT
Tags
20-character tag for each equation
Update rate
300 ms

EMC
Emissions & immunity
Meets requirements of IEC61326 for an Industrial Environment

Electrical
Supply ranges
100 to 240 V AC ± 10 % (90 V min. to 264 V max.) or
105 V DC min. to 115 V DC max.
10 to 36 V DC (optional)
Power consumption
10 W max. 15 VA max.
Power interruption protection
No effect for interrupts of up to 20 ms

Safety
General safety
EN61010-1
Overvoltage Class III on mains, Class II on inputs and outputs
Pollution category 2
CSA 61010-1
UL 61010-1
Isolation
500 V DC to earth (ground)

Environmental
Operating temperature range
–10 to 50 °C (14 to 122 °F)
Operating humidity range
5 to 95 %RH (non-condensing)
Storage temperature range
–20 to 70 °C (–4 to 174 °F)
Enclosure sealing
IP66 and NEMA4X (the enclosure meets the requirements of the NEMA
4X hosedown test)
Vibration
Conforms to EN60068–2–6

Physical
Size
144 mm (5.7 in.) x 144 mm (5.7 in.) x 84 mm (3.3 in.)
Weight
1.0 kg (2.2 lb) approx. (unpacked)
Panel cutout
138 mm (5.43 in.) x 138 mm (5.43 in.) x 67 mm (2.7 in.) behind panel
Case material
Glass-filled polycarbonate
Operator keypad
Tactile membrane keys
No. of keys
6
Cable gland entries
4 x 22.2 mm (0.87 in.) o.d. entries for ½ in. NPT glands
In the powered-down condition the current input is open circuit. In order to maintain a current loop when the recorder is powered down, fit a zener diode (BZX79 – B/C2V4) to the input as shown.
Overall Dimensions

Dimensions in mm (in.)

36 (1.4) 21 (0.8)

Gasket

144 (5.7)

7 (0.3) 48 (1.9)

3 (0.12) 24 (0.9)

Ø 22.2 Ø 30 (0.87) (1.2)

3 Pitches of 34.2 (1.35)

138 +1.0 –0.0 (5.43 +0.04 –0.0)

30 (1.2)

Panel Cut-out

138 +1.0 –0.0 (5.43 +0.04 –0.0) 30 (1.2)

## Standard Accessories

- Included with each recorder:
  - Wall/Panel Mounting Clamps
  - SD Memory Card

## Optional Accessories

- 2 GB SD Card: B12469
- USB SD Memory Card Reader: B12028
- DataManager Pro software: RDM500–CD
- DataManager Pro single user license: RDM500L
- DataManager Pro multi-user license: RDM500ML
- Pipe-mounting Kit: SM500/0703
- Validation package template: CD/VALSM500F
- After-sales engineered configuration service: ENG/REC

## Power Supply

|                      | SM50 | X | X | X/ | X | X | X | X | X | X | X | X/ | XXX |
|----------------------|------|---|---|---|---|---|---|---|---|---|---|---|---|-----|
| 100 to 240 V AC     |      | 0 |   |   |   |   |   |   |   |   |   |   |   |     |
| 10 to 36 V DC       |      | 1 |   |   |   |   |   |   |   |   |   |   |   |     |

(1) Not available with channel options 4, C, D and E
(2) Available only if Ethernet communication is not specified
(3) Available only if Ethernet is specified
(4) Recorder supplied preconfigured to customer’s requirements, together with calibration and conformity certificates.
  Configuration must be supplied using custom configuration sheet – INF08/033.
